

ENROLL US!

We Want to Be a Partner in EPA's
National Partnership for Environmental Priorities

IDENTIFYING INFORMATION

Name of Organization: Kalas Manufacturing
Principal Contact: Todd Ellis
Authorizing Official: _____
Address: 25 Main Street
Phone/Fax: (717) 335-0830 / (717) 335-1943
EPA RCRA ID Number: PAD981045552

Facility Name: Plant # 2
Title: EHS & Facilities Manager
Title: _____
City/State/Zip: Denver, PA 17517
Email: tkellis@kalaswire.com
Date: 9/13/06

PARTNER AGREEMENT

Our organization is choosing to become a partner in EPA's National Partnership for Environmental Priorities. Our goal is to reduce the quantity of one or more Priority Chemicals currently found in our products, processes, or releases using techniques such as source reduction, recycling, or other materials management practices. In this enrollment application, we identify one or more voluntary goals that we believe we can achieve as partners in this program. The voluntary goal(s) provided below is an initial estimate and may change over time. We may revise our goal(s) or withdraw from the program at any time. If/when we choose to revise our goals or withdraw from the program, we will notify EPA.

GOAL #1. Chemical Name: Lead compounds **CASRN:** 7439921

Narrative description of proposed project: _____

Kalas is committed to reducing the overall percentage of lead materials by 20% or 20,000 pounds in the cumulative purchase of compound and color concentrate by December, 2006 through the use of lead-free or reduced-lead raw materials.

Kalas currently purchases an estimated 100,000 pounds of lead in raw materials each year. However, the overall reduction of lead will be proportional to sales for specific product families. When establishing the final baseline for the initiative, Kalas will set a more accurate goal with the help of EPA/DEP associates.

How we will measure success: _____

We will measure success by the reduction in the amount of lead materials purchased compared to the baseline.

1a. Our voluntary **source reduction** goal for Chemical #1 is to reduce the amount of this chemical generated/used from a baseline amount of 100,000 pounds in December, 2004 (month/year) to a reduced amount of 80,000 pounds generated/used by December, 2006 (month/year).

1b. To accomplish this goal, we will use the following source reduction options (check all that apply):

<input type="checkbox"/> Equipment or technology modifications.	<input type="checkbox"/> Process or procedure modifications.
<input checked="" type="checkbox"/> Reformulation or redesign of products.	<input type="checkbox"/> Substitution of less toxic raw materials.
<input type="checkbox"/> Improvements in inventory control.	<input type="checkbox"/> Improvements in maintenance/housekeeping practices.
<input type="checkbox"/> Other (describe): _____	

2a. In addition to, or in lieu of using source reduction methods, our voluntary **recycling or recovery** goal for Chemical # 1 is to increase the recycled or recovered quantity of this chemical from a baseline amount of _____ pounds in _____ (month/year) to an increased quantity of _____ pounds by _____ (month/year).

2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply):

<input type="checkbox"/> Direct use/reuse in a process to make a product.
<input type="checkbox"/> Processing the waste to recover or regenerate a usable product.
<input type="checkbox"/> Using/reusing waste as a substitute for a commercial product.
<input type="checkbox"/> Other (describe): _____
